PROFILE SUMMARY

B.Tech IT graduate and Python Django Developer with hands-on experience building secure backend systems and REST APIs through projects like StockLedger (multi-tenant inventory & billing with FIFO costing) and SoleDrop (e-commerce platform). Skilled in Django, DRF, PostgreSQL, JWT authentication, and application security. Certified Penetration Tester and experienced Academic Advisor mentoring interns. Passionate about continuous learning and delivering production-ready solutions.

SKILLS

Languages & Programming: Python | Object-Oriented Programming | JavaScript | SQL

Frameworks: Django | Django REST Framework

Backend: REST API Development | Django ORM | Authentication | Authorization | JWT | OAuth 2.0 | Serialization

Databases: PostgreSQL | MySQL | Database Design

Testing & Development: API Testing | Debugging | Exception Handling

Frontend: HTML | CSS | Tailwind CSS | Bootstrap

Cloud & Integrations: Cloudinary | API Integration | HTTP Clients

Version Control & Tools: Git | Github | Linux | Postman | Swagger (OpenAPI) | WeasyPrint

PROFESSIONAL EXPERIENCE

Academic Advisor

08/2025 – 06/2026

Bridgeon Skilliversity

- Managed and tracked the progress of multiple trainees, ensuring timely completion of learning milestones.
- Coordinated with mentors and reviewers to resolve issues and maintain training schedules.
- Analyzed trainee performance and provided structured feedback to support continuous improvement.
- Maintained trainee records, review schedules, and progress reports with accuracy and attention to detail.

PROJECT EXPERIENCE

StockLedger – Multi-Tenant Inventory & Billing System for Wholesale Distributors

- Built production **REST API (Django + DRF, 8+ endpoints)** with **100% multi-tenant isolation, JWT auth, and role-based access control**.
- Implemented **FIFO inventory costing + append-only audit ledger** ensuring **100% transaction immutability** across stock movements.
- Designed **PostgreSQL** multi-tenant schema with transactional financial workflows (invoices, payments, stock reversal) preventing reconciliation errors.
- Delivered comprehensive reporting suite (stock valuation, sales analytics, low-stock alerts) and **automated PDF invoicing with WeasyPrint**; eliminated manual spreadsheet dependency for wholesale operations.

SoleDrop – E-Commerce Shoe Selling Platform

- Developed a shoe-selling web application using **Django** following the **MVT architecture**.
 - Implemented product listing, product detail pages, shopping cart, and order placement functionality.
 - Integrated **Cloudinary** for product image storage and management.
 - Configured **PostgreSQL** for data storage and management.
 - Implemented Telegram order notifications using the Python **Requests library** to provide real-time order updates.
 - Designed a responsive user interface for seamless usage across desktop and mobile devices.
- Managed source code and version control using **Git** and **GitHub**.
