PROFESSIONAL SUMMARY

Python and Django backend developer (B.Tech IT) who builds secure, multi-tenant REST APIs with Django REST Framework and PostgreSQL. Built StockLedger, a multi-tenant inventory and billing API with JWT authentication, role-based access control and FIFO costing, and SoleDrop, a live e-commerce platform. Certified Penetration Tester with a security-first approach to API design.

TECHNICAL SKILLS

Languages: Python, SQL, JavaScript
Frameworks and APIs: Django, Django REST Framework, REST API Development, Django ORM, Serialization, Swagger (OpenAPI)
Authentication and Security: JWT, OAuth 2.0, Role-Based Access Control, Application Security, Penetration Testing
Databases: PostgreSQL, MySQL, Database Design
Tools and DevOps: Git, GitHub, Docker, Linux, Microsoft Azure (Container Apps, PostgreSQL Flexible Server), Postman, API Testing, Debugging, Cloudinary, WeasyPrint
Frontend: HTML, CSS, Bootstrap, Tailwind CSS

PROJECTS

StockLedger: Multi-Tenant Inventory and Billing System for Wholesale Distributors
Django, Django REST Framework, PostgreSQL, JWT, Docker, WeasyPrint, Microsoft Azure

- Built a production REST API with Django and DRF (8+ endpoints) enforcing 100% multi-tenant data isolation, JWT authentication and role-based access control.
- Implemented FIFO inventory costing and an append-only audit ledger, making every stock movement immutable.
- Designed a PostgreSQL multi-tenant schema with transactional workflows for invoices, payments and stock reversals, preventing reconciliation errors.
- Delivered reporting (stock valuation, sales analytics, low-stock alerts) and automated PDF invoicing with WeasyPrint, replacing manual spreadsheets.
- Deployed the backend on Azure Container Apps and the database on Azure Database for PostgreSQL Flexible Server, with the Docker image hosted on Docker Hub.

SoleDrop: E-Commerce Shoe Selling Platform | Live demo: soledrop.onrender.com
Django (MVT), PostgreSQL, Cloudinary, Python Requests, Git, GitHub

- Developed a full-stack e-commerce application with product listing, product detail pages, shopping cart and order placement.
- Integrated Cloudinary for product image storage and PostgreSQL for data management.
- Implemented real-time Telegram order notifications using the Python Requests library.
- Designed a responsive interface for desktop and mobile devices.

PROFESSIONAL EXPERIENCE

Academic Advisor | Bridgeon Skillversity | Aug 2025 - Jun 2026

- Mentored and tracked the progress of multiple trainees, ensuring timely completion of learning milestones.
- Coordinated with mentors and reviewers to resolve issues and maintain training schedules.
- Analyzed trainee performance, provided structured feedback and maintained accurate progress records.

EDUCATION

Bachelor of Technology (B.Tech), Information Technology | Anna University | 2021 - 2025

CERTIFICATIONS

- Certified Penetration Tester (CPT), RedTeam Hacker Academy | Jan 2023
- Bug Bounty Hunter (BBH), RedTeam Hacker Academy | Mar 2023
- Python Django, Avodha | Sep 2024
